HISTORY OF MINING IN ARIZONA
VOLUME III

PREFACE

This third volume of the “History of Mining in Arizona” to be published in the last ten years is a worthy addition to its predecessors. A knowledgeable group of authors has given us a glimpse into the finding and development, such as it was, of mines and mining camps which were an integral factor in the early development of Arizona. To the uninitiated, these chapters bring life to places and events they may know only as names they see on some road map. To those of us familiar with mining they bring a better understanding of the efforts and difficulties faced by our ancestors.

Written for the most part in a less technical and more readable style like volumes one and two, and including an index for all three volumes which was sorely needed, this new book is a must for Arizonans and mining men.

Jack E. Thompson
Retired-President
Newmont Mining Corp.

FOREWORD

Ten years have passed since Volume I was published. These years have provided a great learning experience: learning about Arizona history, its people and places. I have learned how much harder it is to coordinate the compilation of a book when the co-editors are spread across the country.

Volume III of History of Mining in Arizona offers topics and authors to compliment Volumes I and II.

The effort put forth to compile these three volumes is a shining example of the dedication of the people who have contributed to the success of The History of Mining in Arizona. The authors and editors donate their time and talents. All proceeds from the sale of the books goes to the Mining Foundation to fund scholarships, and other endeavors. The effort and time put into these volumes is only surpassed by the joy in seeing the fine quality of the finished work.

J. Michael Canty
Coeditor
